J. -

## ■ Preconditions

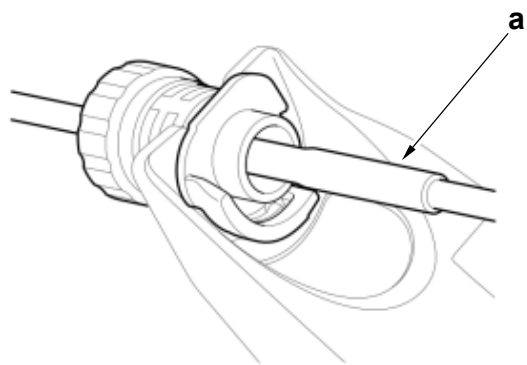

- Transmission R position/mode

## ■ Sub-Procedure

**NOTICE**

- Do not remove the shift cable by pulling the shift cable guide (a). (Figure 1)

Figure 1

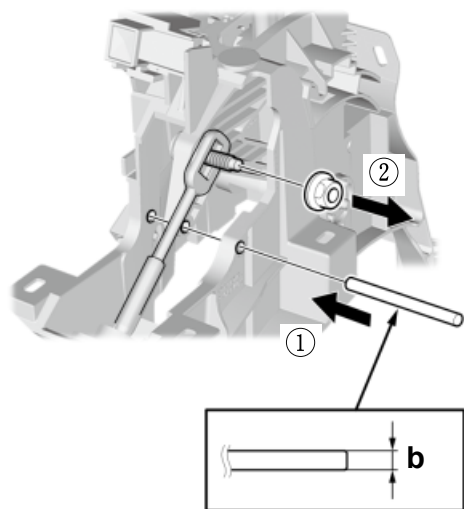

• Removal

1. Refer to figure 2.

Pin Specifications (Figure 2)

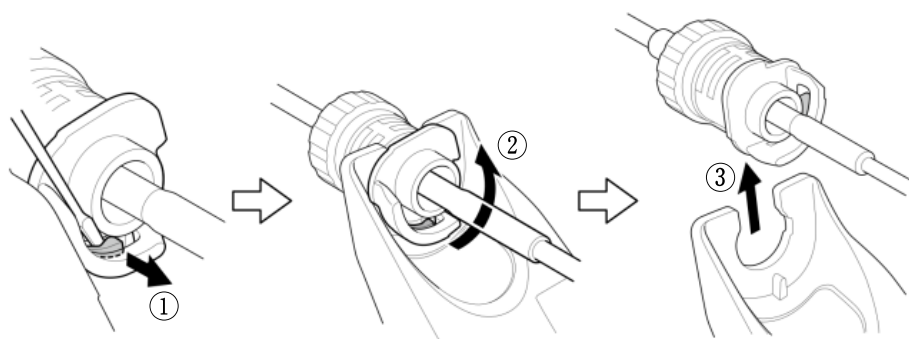

Specification	
b	6.0 mm (0.24 in)

Figure 2

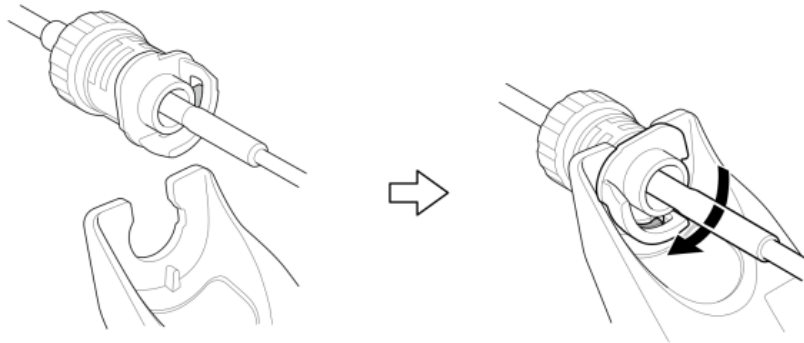

2. Refer to figure 3.

Figure 3

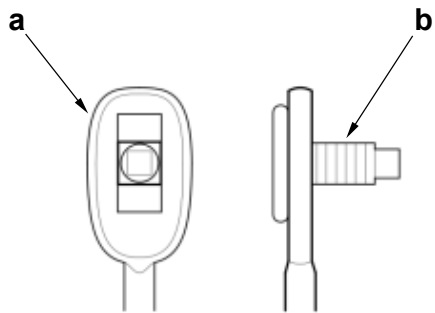

2. Refer to figure 4.

**Figure 4**

3. Make sure that the shift cable end (a) is properly installed on the mounting stud (b). (Figure 5)

**Figure 5**

- Shift cable after install check.
    - 1. Turn the vehicle to the ON mode.
    - 2. Move the shift lever to each position/mode, and check that the shift position indicator follows the shift lever operation.
    - 3. Shift the transmission to P position/mode, and check that the shift lock works properly.
    - 4. Push the shift lock release, and check that the shift lever releases. Also check that the shift lever locks when it is shifted back to P position/mode.
    - 5. Start the engine.
- NOTE: Check that the engine starts in P or N position/mode, and does not start in any other positions/modes.
- 6. Make sure the vehicle is turned to the OFF (LOCK) mode with the shift lever in P position/mode. If it is not, adjust the shift cable again.
